

ICCT in action and building for more

IBM Center for Cloud Training has brought cloud knowledge and skills to thousands. Here are a few highlights:

Provided self-paced digital courses with hands-on exercises, optimized for in-demand job roles

Developed specialty learning paths to provide in-depth knowledge, including one focused on IBM Cloud for Financial Services

Awarded Best Program for Upskilling Employees by Brandon Hall Group

What people are saying:

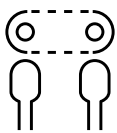

“Great course for the foundations of cloud computing!”

“The real-life applications are amazing and can inspire any professional/student to achieve a position in the cloud industry.”

“Helped me understand cloud concepts better.”

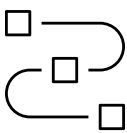

“Very well-designed course.”

IBM Cloud Training is built for enterprises

Consistency

Builds teams with an assured set of skills by aligning with industry certifications

Reduced administration

Provides a single, all-you-can-learn access to a catalog of modules and hands-on labs

Programmatic learning

Helps you track learner enrollment and progress via administrative consoles
